4 Choose Vent Size

LiteTip & Micro Molds come with largest vent possible unless otherwise requested.

	MicroMold & RITE Molds	LiteTip	R	L
No Vent	0	0	☐	☐
Small	0.8	0.7	☐	☐
Medium	1.4	0.8	☐	☐
Large	2.4	1.2	☐	☐
X Large	>2.4	1.5	☐	☐
XX Large		2.4	☐	☐
MAX Vent	Large as possible		☐	☐

• Power Molds default to 1.4mm vents unless otherwise requested.

• LiteTip, Micro Molds and RITE ear molds have short vent lengths. The vent effect is the same as standard vents with larger diameters.

• Max vent is the largest vent possible and is not associated with a certain size or style.

See reverse side for warranty information.

Special Instructions:

Custom RITE Earmolds

RITE & Corda miniFit Earmold Form

A successful RITE fitting requires the appropriate mold. Oticon's RITE Earmold solutions accommodate the most difficult ears. MicroMolds and LiteTips fit miniFit, Standard, Medium and Intiga speakers. You select the speaker type depending upon the hearing device, and the proper size mold will be made for your patient.

Speaker Type

Velox/Inium Sense/Inium			Inium Sense/Inium				Rise 2		
Opn, Alta2/Alta, Nera2/Nera, Ria2/Ria, Sensei			Alta2/Alta, Nera2/Nera, Ria2/Ria, Sensei		Alta2/Alta, Nera2/Nera, Ria2/Ria		Agil, Acto, Ino		Intiga
									
miniFit 60 or 85			miniFit Power		designRITE 80		Standard		Medium
							Power		Intiga

Custom Mold Styles

LiteTip (Hollow)	Micro Mold (Solid)	Power Receiver Mold (Opn, Alta2/Alta, Nera2/Nera, Ria2/Ria, Sensei)	Power Mold (Agil, Acto, Ino, Epoq, Vigo Hit)	Corda miniFit (Hollow)
				

Retention Locks

All mold styles are offered with canal locks and skeleton locks for better retention. Helix locks, Half Skeleton and Semi Skeleton styles are also available upon request. (Retention Lock options vary by style and material selected.)

Canal Lock	Helix Lock (Available in hard material only)	Skeleton Lock	Half Skeleton	Semi Skeleton (Available in hard material only)
				

*VarioTherm Material

VarioTherm is a body temperature-reactive plastic for soft flexible earmolds. The unique properties of this material allow the mold to remain hard at room temperature for ease of insertion and then soften (become more flexible) at body temperature for increased comfort and optimum sealing.

Available in two shore hardnesses: VarioTherm 50 Shore and VarioTherm 70 Shore. With the hollow design of the LiteTip VT, 70 Shore is recommended and will be standard. For Micro Mold VT, a 70 Shore or 50 Shore can be used. Both offer optimum sealing, however if feedback issues arise, the softer version VarioTherm 50 Shore is recommended.

Please note: This material requires gentle warming/softening of the mold with a hair dryer before insertion or removal of the receiver.

Wax Protection System

Custom molds (except LiteTips) use the ProWax system. All miniFit receivers use the ProWax miniFit wax system.

ProWax

ProWax miniFit

Earmold Warranty

Earmolds come with a 1 year warranty against material or workmanship defects. Remakes will be provided at no charge for up to 90 days from the time of purchase. **In the event of a remake, a new impression may be required for certain power molds with canal locks.** Power Molds have a 90 day return privilege. Earmolds are non-returnable for credit. Power Receiver Molds house the receiver inside the mold and are not interchangeable. These instruments carry the same repair warranty as the instrument. Remakes for fit not included.

Existing Instrument

If existing instrument information is unspecified, mold will be made so it can fit both miniRITE 60 or 85 speakers, space permitting. designRITE speaker must be indicated. Material is clear acrylic unless soft option is indicated.
